Valley Green

M.S.O.

Methylated Seed Oil

PRINCIPAL FUNCTIONING AGENTS:

Methylated Soybean Oil, Ethoxylated Alkylaryl Surfactants 100.0%

All ingredients exempt from the requirements of a tolerance under 40 CFR 180.

WARNING

KEEP OUT OF REACH OF CHILDREN

Causes eye irritation. Do not get in eyes. Wear protective eyewear when handling. Avoid breathing vapors. Use a respiratory protection device. Harmful if swallowed. Avoid contact with skin. When handling wear coveralls over short sleeved shirt, short pants, socks, chemical resistant shoes and chemical resistant gloves.

NOTE: Read and follow all label directions and cautions on all products used.

SEE INSIDE PAGES FOR FIRST AID AND DIRECTIONS FOR USE INSTRUCTIONS.

FIRST AID: Call a poison control center or doctor immediately for treatment advice.

IF SWALLOWED: Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth to mouth if possible.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses if present, after the first 5 minutes, then continue rinsing eye. Have the product container with you when calling a poison control center or doctor, or going for treatment.

GENERAL INFORMATION

VALLEY GREEN MSO is a combination of highly refined methylated seed oil and selected surfactants. VALLEY GREEN MSO is designed to be used with turf pesticides, that suggest or require the use of an MSO on their label such as BASF DRIVE®.

Because of its oily nature, VALLEY GREEN MSO dissolves into the waxy cuticle, carrying the active ingredient with it. Tough, waxy plant cuticles, especially those that develop during hot, dry conditions, can, therefore, be penetrated more effectively. This allows the active ingredient to reach the inside layers of the plant more readily, where it is carried to the rest of the plant to do its job more reliably. VALLEY GREEN MSO works under all conditions and types of weather to ensure steady performance.

DIRECTIONS FOR USE

Use VALLEY GREEN MSO in spray mixture at a rate of 1 - 2 pints per acre at a spray rate of a minimum of 20 gallons per acre. The level of VALLEY GREEN MSO is not to exceed 1% of the spray volume.

Do not use higher percentages of MSO, or lower volumes of spray solution per acre, as this may cause damage to sensitive plants such as turfgrass.

NOTE: The application rates on this label are based on pesticide labels that recommend the use of a methylated seed oil. Always follow the pesticide manufacturer's directions. Caution should be used when applying this or any other product during hot, dry conditions. Applications of any liquid during these stressful conditions may cause additional yellowing of the turf or other plants due to the application. Care should be taken as to the time of day of the application, and amount of all materials applied in tough environmental conditions.

MIXING or USE RATES

Prior to pesticide application, clean mixing and application equipment according to pesticide label directions.

To minimize foaming fill spray tank 2/3 or 3/4 full of water. If foaming is anticipated, the addition of an antifoaming agent should be added before pesticides, nutrients, or VALLEY GREEN MSO. Add pesticides and/or fertilizers as directed by label or in the following sequence: A. Micronutrients and fertilizers, B. Dry flowables and dispersible granules, C. Flowables, D. Water soluble pesticides, E. Emulsifiable concentrates.

Continue agitation and add VALLEY GREEN MSO. After the addition of VALLEY GREEN MSO, reduce agitation and allow to mix for 1 to 2 minutes. Continue filling tank while under minimal agitation.

NOTE: For optimum results, spray mixes containing VALLEY GREEN MSO should be applied within 36 hours.

HANDLING AND STORAGE

For optimum storage stability, store above 40°F (5°C). If product develops solids, allow to warm until all solids are dissolved and shake thoroughly before use. Avoid contact with eyes and skin. Do not store near oxidizing agents.

CONTAINER DISPOSAL: Triple rinse. Then offer container for recycling or reconditioning, or puncture and dispose of in a sanitary landfill. If incineration is allowed, stay out of smoke.
